SHOCK ABSORBER FOR KAWASAKI NINJA400 RACING

PART NO: KA 745

The Öhlins STX36 Supersport shock absorber KA 744 for Kawasaki Ninja 400 originally was developed for road & track use. The KA 745 is recommended for racing only. This version has a stiffer setting designed to give you even better feel and ultimately faster lap times!

With its well proven monotube design, the Öhlins STX36 Supersport shock absorber sets the standard for performance, quality, durability and gives you better control. As a major suspension upgrade for your sports bike, it features a 36 mm main piston, an external high pressure gas reservoir as well as separate compression and rebound damping adjustment. Additionally adjustable spring preload and length, the STX36 Supersport allows you to adjust the shock absorber to suit your weight and riding style.
