SHOCK ABSORBERS FOR VESPA GTS 300

PART NO: PI 901 • PI 902

Upgrades from Öhlins transform the Vespa GTS 300 riding experience with new front and rear suspension units.

This sporty and dynamic bike is not only for commuting but also a bike you can really have fun with! Öhlins suspension will improve the performance of your suspension giving you better traction and control over the bike.

For front shock absorber, the STX 36 monotube high pressure gas type of shock absorbers with external "piggy back" reservoir, adjustable spring preload for front shock absorber. For rear shock absorber, the STX 36 emulsion type of shock absorbers has adjustable spring preload and allows you to adjust the damper to suit your weight and riding style. You will feel improved comfort and traction wherever you ride.
